

Highways Technical Job Family

Framework

Introduction

A job family is a way of describing and grouping the different levels of responsibility for similar roles. The work for each family is described in broad generic job descriptions which capture key accountabilities, typical skills and experience needed together with any essential qualifications, competencies and performance outputs (measures). Each family will have a number of different levels of responsibility; each level matches an existing grade within our salary structure. All engineering posts currently JG3- JM3 will be moved to the job families.

There will be no need for individual job descriptions as the generic ones can be used for recruitment, induction and on-going performance management. Employees will also be able to see the relationship between the levels within the same family which can help with developing personal career pathways.

This job family has been specifically designed to show the career path for technicians and engineers within the Highways and Transportation & Highway Ops services. Where posts are already within an engineering career grade they will transfer to the new career grade operation between JG3-JM3. Progression beyond Principal Engineer (JM2) will also be subject to suitable vacancies and the service requirements. Continuation in the post and progression from one level to the next will be dependent on the attainment of the appropriate qualifications including professional accreditation, and demonstration of the required skills and competences as assessed by the appraising manager and service manager.

Qualification level requirements are in accordance with the comparison set out at the following GOV.Uk web site;
<https://www.gov.uk/what-different-qualification-levels-mean/compare-different-qualification-levels>.

All staff are required to maintain a record of their continual professional development (CPD). The focus of the assessment will be to determine whether the candidate can work to the relevant job descriptor. The candidate will be required to produce evidence of qualifications and their CPD showing two or three key pieces of work that demonstrate the competencies required. Full assessment will be through interview and a presentation supported by evidence from the individual's appraisal. Application for progression can be made at any time but only one application can be made each year. Should an application for progression be turned down then the candidate may appeal to the Head of Service. The decision from the appeal is final.

The council has a training scheme to support the attainment of qualifications. Where the post-holder terminates their employment with the council during or within two years of completing the professional training, the council will reclaim the financial assistance given. However, financial assistance will not be reclaimed if the course is discontinued because of pregnancy, ill health or redundancy or other exceptional circumstances. Where an employee discontinues a course, fails to sit an examination within a reasonable period of time, or fails to show satisfactory progress, the council will reclaim the financial assistance given. Where an employee fails an examination despite satisfactory effort, the council will pay for and allow time to attend a re-sit. This will be granted once only.

In exceptional circumstances directly relevant experience may be accepted as an alternative to the minimum qualification requirement at the discretion of the Director.

Overarching all level profiles and generic job descriptions are the council's principles for equalities and diversity, health and safety and continuous personal development.

Equality and Diversity

We expect all employees to act professionally and to treat colleagues and service users with dignity and respect. This means setting a strong personal example of good equality and diversity practice at all times and ensuring they are sensitive to the needs and views of others and reflect this in the way they behave. Managers have additional responsibilities of managing others effectively by recognising and valuing each team member as an individual and always challenging inappropriate language and behaviour.

Health and Safety

We all have a responsibility to work within health and safety legislation, associated codes of practice, North Somerset Council's policies and procedures and our local safe systems of work and emergency arrangements.

Continuous Development

Our jobs and the way we do things evolve over time and we need to keep abreast of new technologies, legislation and methodologies for our own subject areas. We are responsible for reviewing and developing our own professional practice. The Engineering Council has recommended levels of CPD hours which should be met for the different levels of professional engineer.

Jobs in this family are concerned with the application of technical expertise in order to shape and deliver specific council services. In addition to direct service delivery to customers, job holders will use their knowledge, skill and expertise in a particular discipline to improve the delivery of existing services and develop new services.

Comparison of different qualification levels – GOV.UK

Regulated qualifications in England, Wales and Northern Ireland are in one of the following frameworks:

- National Qualifications Framework (NQF)
- Qualifications and Credit Framework (QCF)
- Framework for Higher Education Qualifications (FHEQ)

The table shows how the common qualifications compare. The levels show how difficult a qualification is.

There is no simple comparison for NVQ levels in 4 and 5. Contact the National Careers Service if you need advice.

JOB FAMILIES ~ Technical

Level descriptors

Level	Example job roles	Role Purpose
Level 1 (kh ~ 76)	Not Used	Required to undertake routine and repetitive tasks to general instruction.
Level 2 (kh ~ 87)	Not Used	Required to undertake a broader range of routine tasks needing some formal training or practical work experience.
Level 3 (kh ~ 100)	Trainee Technician NVQ2	Required to carry out a range of activities working within detailed procedures and routines to clearly defined guidelines. Roles at this level will require a specific knowledge of duties performed and how these contribute to the service area. Commitment to obtaining next level of NQF qualification in a construction related subject.
Level 4 (kh ~ 115)	Technician Technical Support Officer NVQ3	Required to carry out a range of more complex activities working within existing procedures and routines with limited supervision. Roles at this level will require a broad knowledge and understanding of the work processes in the specific area of work. Post holders will resolve routine technical and process problems and queries, escalating the more complex to others. Commitment to obtaining next level of NQF qualification in a construction related subject.
Level 5 (kh ~ 132)	Senior Technician Assistant Surveyor NVQ3/4	Required to give a practical support or advisory service to service users within frameworks or assessments from other professionals using specialist knowledge that will be acquired through practical experience or vocational qualifications. Roles at this level may work unsupervised much of the time within defined procedures but with readily available advice from managers. Commitment to obtaining next level of NQF qualification in a construction related subject.
Level 6 (kh ~ 152)	Assistant Engineer Enforcement Officer NVQ4	Required to undertake a number of diverse specialist or technical activities within a service function using skills that would have been gained through formal qualifications and/or considerable relevant work experience. Roles at this level are expected to work unsupervised for much of the time, accessing and assessing information independently.
Level 7 (kh ~ 175)	Engineer Area Officer Level 4/5 Qualification	Expected to undertake specialist or technical assessments/activities and make decisions based on these assessments within a service function using skills that would be gained through professional qualifications and/or practical experience. Roles at this level are entry level for newly qualified professionals or those with significant relevant experience who are responsible for creating appropriate work plans/programmes/intervention for self and/or others.

		Roles at this level can be involved in supervising/managing the work of others within an overall management framework.
Level 8 (kh ~ 200)	Senior Engineer Senior Enforcement Officer Food & Safety Officer NVQ5+	Expected to undertake specialist or technical activities that required academic and practical knowledge gained through formal qualifications and relevant work experience. Typically roles at this level deliver a professional specific service, are part of a collaborative team responsible for delivery of services and assist in specific service developments.
Level 9 (kh ~ 230)	Principal Engineer Lead Officer EHO Area Surveyor Principal Surveyor NVQ6+	Required to have significant post qualification experience to deliver specific work streams, provide technical advice and guidance to others (including other professionals) involved in specific service delivery and may have responsibility for managing resources within a team (budget and people).
Level 10 (kh ~ 264)	Lead Engineer Principal F&S Officer Principal Trading Standards Officer Principal EHO Senior Area Surveyor Professional status	Responsible for leading on work streams, managing a team (including other professionals, possibly from other disciplines), ensuring service delivery through self and others, contributing to development of business plans and service direction, managing budget resources, monitoring service standards.
Level 11 (kh ~ 304)	This is likely to be level 1 in the Management & Leadership job family ~ where the primary focus of the role is the tactical alignment of strategies with service delivery	Setting standards and procedures for others, developing business plans for service areas, contributing to future service direction, advising partner agencies in developing and delivering complementary service arrangements, managing and developing others, providing technical and professional expertise.
